NATIONAL ECONOMIC OUTLOOK CONFERENCE

AI & Economic Resilience with Inclusive Growth

MENARA AFFIN @ TRX, KUALA LUMPUR

26 November 2026

NATIONAL ECONOMIC OUTLOOK CONFERENCE

AI & Economic Resilience with Inclusive Growth

AI AND ECONOMIC RESILIENCE WITH INCLUSIVE GROWTH

The 2026 National Economic Outlook Conference (NEOC) examines how Artificial Intelligence (AI) can strengthen Malaysia's economic resilience, productivity and competitiveness while ensuring that its benefits are broadly shared. With AI adoption in Malaysia rising rapidly, policymakers face the challenge of enabling innovation while preparing businesses, workers and communities for a changing economy. Recent global disruptions have also highlighted the need for stronger capacity to anticipate risks, adapt quickly and sustain growth.

The conference focuses on four key sessions. The first examines Global, Asian and Malaysian Economic Trends and Risks. With a focus on the Economic Outlook 2027–2028. The second, AI and Economic Dynamism, explores how artificial intelligence can enhance productivity, innovation and economic resilience. The third, Impact of AI on Labour Market and Economy, explores how AI is impacting the labour market and economy. It focuses on how Malaysia can strengthen reskilling, upskilling, and workforce readiness to help workers adapt and benefit from new opportunities in an AI-driven economy. The fourth, AI and Economic Sustainability, examines how AI can support green growth, and improve resource efficiency. By bringing together policymakers, industry leaders, academics and communities, NEOC 2026 aims to generate practical insights and policy perspectives on harnessing AI as a driver of resilient, sustainable and inclusive economic growth.
